Professional Experience

VeraCore Software Solutions, Inc.

Software Engineer

Farmington, CT

May 2018 - Present

- Write robust and performant code for a new VeraCore app, designed to utilize a microservices model and modern frameworks such as ASP.NET Core Blazor
- Utilize Kubernetes, Kafka, NoSQL databases, and a variety of other technologies to incorporate scalability into VeraCore's app and handle tens of thousands of users
- Collaborate with skilled engineers, designers, clients, and stakeholders daily to produce a desirable application
- Host regular internal classes on topics such as NoSQL, graph databases, and Feature Testing

Development Intern

Summers, 2016 - 2017

- Explored, prototyped, and documented potential reporting integrations
- Established a scaffold for VeraCore's first mobile dashboard application, utilizing a traditional web development stack and Apache Cordova
- Developed modules for integrating with ecommerce applications, primarily in PHP and javascript

Tech Services Intern

Summer 2015

- Set up and maintained a variety of Windows and Linux servers
- Provided general tech support services for the company

HuskyTech

Lead Technician

Storrs, CT

August 2015 - April 2018

- Assisted university students and faculty with various software and hardware issues
- Organized and facilitated improvements in the company by analyzing client feedback and promoting changes to accelerate tech service workflows

University of Connecticut

Teaching Assistant

Storrs, CT

January 2018 - April 2018

- Hosted a two-hour class every week on the topics of data structures and object-oriented design

Education

University of Connecticut, School of Engineering

B.E - Computer Science and Engineering - 3.8 GPA

Storrs, CT

Class of 2018
